PROFESSIONAL EXPERIENCE

PMI Advisory GmbH

Hamburg, Germany

Working Student Data, Analytics & AI

Sep 2025 – Present

- Designed and implemented data-driven analytical frameworks and platforms, enabling portfolio companies to quantify and monitor value creation drivers, including contributions to Customer Cube 2.0.
- Engineered and optimized scalable data pipelines and analytical workflows using Python, dbt, and related tools, while delivering ad-hoc data analyses to support acquisitions and investment decisions.

Pars System Energy Company

Tehran, Iran

Business Intelligence Junior Specialist

Apr 2023 – Jul 2024

- Developed and maintained databases and ETL pipelines by cleaning/transforming data from internal systems; created interactive dashboards to improve business performance tracking and data visualization.
- Monitored and controlled project timelines and deliverables, ensuring on-time completion and streamlined progress reporting. Implemented an office automation process that reduced manual administrative tasks and paperwork, increasing operational efficiency across the company.

Gas Turbine Research Center

Tehran, Iran

Project Management Officer

Aug 2021 – Aug 2023

- Supported project monitoring by tracking progress, timelines, and ensuring adherence to deliverables.
- Created dashboards and conducted cost analyses, enabling data-driven decision-making.
